

LACEY TOWNSHIP SCHOOL DISTRICT

A Tradition Of Pride · A Tradition Of Excellence

VANESSA P. CLARK, PH.D.
SUPERINTENDENT OF SCHOOLS

April 10, 2019

Dear Parent:

Officials from the Ocean County Health Department have informed us that the student at Forked River Elementary School suspected of having measles does **NOT** have the virus. The final medical test results were **NEGATIVE**.

In light of the recent events related to measles, information about measles will continue to be posted on our website. An important point to keep in mind is that now is still **a great time for all families, teachers and school administrators to review their vaccine records and get their vaccines up to date.**

Again, please see the Forked River School and District website for more information about measles and measles immunity. If you have questions, please don't hesitate to contact Principal Fiedler or the School Nurse, Mrs. Mattoon at 609-971-2080, or me at 609-971-2000, ext. 1002.

Sincerely,

Vanessa P. Clark, Ph.D
Superintendent of Schools
