

How to figure out players' points for a swim meet:

Individual events points are as follows:

- 1st – 6 pts.
- 2nd – 4pts.
- 3rd – 3 pts.
- 4th – 2 pts.
- 5th – 1 pt.
- 6th – 0 pts.

Relay events points are as follows:

- 1st – 8 pts.
- 2nd – 4 pts.
- 3rd – 2 pts.

Relay points are divided by four to determine an individual's meet total.

For example, "Swimmer A" swims 4 events. (S)he gets a 1st and a 3rd in the individual events and a 2nd and a 3rd in the relays. The tally for "Swimmer A" would be as follows:

- 1st – 6pts. (Individual)
- 3rd – 3 pts. (Individual)
- 2nd – 1 pt. (Relay – $4 \div 4 = 1$)
- 3rd - .5 pt. (Relay – $2 \div 4 = .5$)
- Total Points = 10.5
