

LACEY FOOTBALL

A mission statement revisited:

Will never compromise our principles for short-term success. We will always do things the right way and be an example of what is good about sports and football. Above all, our coaches and student athletes will be coaches and athletes of character and integrity.

Will create an atmosphere and environment that will guide our players to become successful people. Their involvement in our program will be a positive influence in all aspects of their life.

Will provide an opportunity for each athlete to become better students through academic support and the stressing of academic excellence. This is part of our philosophy of having a championship mentality in everything we do.

Will help each player reach his full athletic potential. Everyone in our program will be asked to work tirelessly to ensure that our players will have the opportunity to be their very best. Our work ethic will be a testament to our goal of winning championships.

Will build relationships with and among our players to ensure that upon graduation they will always be a welcomed and esteemed part of our football family.

Our mission statement is our roadmap. What it says is that we have a vision for our football program and, more importantly, for those people who are a part of it.
